Dave Wilson Nursery varieties for 2018:

Anna Apple Remarkable fruit for mild winter climates in So. Calif., So. Ariz. Heavy crops of sweet, crisp, flavorful apples even in low desert. Fresh/cooked. Keeps 2 months in refrigerator. 200 hours. Self-fruitful or pollenized by Dorsett Golden or Einshemer. USDA Zones 5-10.

Arkansas Black Spur Apple Large, late season. Dark red skin, high quality even where summer nights are warm. For dessert and cooking. Keeps many months. Chilling requirement 500-600 hours. Partly self-fruitful. USDA Zones 5-9.

Braeburn Apple New, from New Zealand. Superb late season fruit: very crisp and tangy, more flavorful than Granny Smith. Excellent keeper. Green with dark red blush. October-November harvest. 700 hours. Self-fruitful. USDA Zones 5-10.

Empire Apple Sweet and juicy with sprightly flavor, a cross of McIntosh and Red Delicious. McIntosh-type apple for hot summer climates. Heavy bearing tree. Early fall harvest. Good pollinizer for Mutsu, Gravenstein, Winesap, Jonagold. 800 hours. Self-fruitful. USDA Zones 4-9.

Fuji Apple Introduction from Japan that quickly became California's favorite apple. Sweet, very crisp and flavorful, excellent keeper. Dull reddish orange skin, sometimes russeted. Ripe mid-September. Excellent pollinizer for other apple varieties. Low chilling requirement - less than 500 hours. Self-fruitful. USDA Zones 6-9.

Gala Apple Wonderful dessert apple from New Zealand. Crisp, nice blend of sweetness and tartness, rich flavor. Skin reddish orange over yellow. Early harvest, 2 - 3 weeks before Red Delicious. Good pollinizer for other varieties. Adapted to cold- and warm-winter climates. Chilling requirement less than 500 hours. Self-fruitful. USDA Zones 4-10.

Granny Smith Apple From New Zealand. Large, late, green, all-purpose. Crisp, tart, excellent keeper. Requires long summer. Thrives in hot climates. 400 hours. Prolonged bloom: good pollinizer for other apples. Self-fruitful. USDA Zones 6-9.

Gravenstein Apple Famous for sauce and baking, also used fresh. Crisp, juicy, flavorful & tart. Early bloom, early harvest. 700 hours. Pollinizer required: Empire, Fuji, Gala, Red Delicious. Not a pollinizer for other varieties. USDA Zones 2-9.

Honeycrisp Apple Winter hardy tree from the University of Minnesota. Fruit is crisp and juicy with an aromatic flavor. Striped red over yellow color. Stores well. Ripens mid-August. Pollenized by Gala, Granny Smith, Empire, McIntosh and Red Delicious. USDA Zones 3-8.

Multi-Bud Apple, Fuji-Gala-Golden Delicious-Granny Smith Fuji, Gala, Golden Delicious and Granny Smith budded onto M-111 rootstock. Finished trees include 4n1's plus assorted 3n1's and 2n1's.

Northern Spy Apple Large, firm fruit is aromatic, with a lively, tart flavor. Greenish-yellow skin with red blush or stripes. Dessert/cooking, excellent keeper. Winter hardy, vigorous tree. Slow to begin bearing. Harvest about 10 days after Golden Delicious. 1,000 hours. Pollenized by Golden Delicious. USDA Zones 4-7.

Pink Lady® Apple Hot climate apple from Western Australia. Very crisp, sweet tart, distinct flavor, good keeper. Skin reddish pink over green when ripe. White flesh resists browning. Harvest begins late October in Central CA, about three weeks after Fuji. Self-fruitful. 300-400 hours. USDA Zones 6-9.

Red Gravenstein Apple Famous for sauce and baking, also used fresh. Crisp, juicy, flavorful & tart. Green with red stripes. Early bloom, early harvest. 700 hours. Pollinizer required: Empire, Fuji, Gala, Red Delicious. Not a pollinizer for other varieties. USDA Zones 2-9.

Canadian White Blenheim Apricot One of the all-time top-scoring apricots in Dave Wilson Nursery blind taste tests. Syrupy sweet white flesh with firm texture. 700 hours. Pollenized by other late blooming apricot. USDA Zones 4-7..

Chinese Apricot Cold hardy, frost hardy, sets heavy crops of small to medium size sweet fruit. Recommended for difficult climates prone to spring frosts. 700 hours. Self-fruitful. USDA Zones 4-7.

Harcot Apricot From Canada. Frost hardy late bloom. Resists brown rot and perennial canker. Medium to large fruit ripens early to mid-June in Central CA. Sweet, juicy, rich flavor one of the best. 700 hours. Self-fruitful.

Tomcot Apricot A consistently productive apricot variety. Large, orange fruit with firm, sweet flesh. Slightly tart, old-time apricot flavor. Early harvest, 2 - 3 weeks before Wenatchee Moorpark. Originated at Prosser, WA, introduced in 1989. 500 hours or less. Partly self-fruitful, largest crops if cross-pollenized by another apricot. USDA Zones 4-8.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Cot-N-Candy White Aprium® Interspecific

Apricot Wonderful new fruit from Zaiger Hybrids. White flesh apricot-plum hybrid. Medium-sized with incredible flavor, very sweet and juicy. Ripens early- to mid-July. Self-fruitful. 400 hours or less. USDA Zones 7-10. (Pat. No. 17827) (Zaiger)

Leah Cot Aprium® Interspecific Apricot Large size Aprium® with deep orange color inside and out. Reliable annual bearer, high flavor and firm texture, ripens mid to late June in Central California, just after Flavor Delight Aprium®. Self-fruitful, required chill 500 hours or less, best in zones 7-10. U.S. Plant Patent No. 21863 (Zaiger)

Summer Delight Aprium® Interspecific Apricot New introduction for 2016. This late-season Aprium® is a reliable bearer with very juicy flesh and great apricot flavor. Ripens late July-early August at Hickman, California. Self-fruitful, chilling requirement 500 hours or less. Best in zones 7-10. U.S. Plant patent pending (Zaiger)

20th Century Asian Pear Juicy, sweet, mild flavored fruit is crisp like an apple. Early to mid-August in Central CA. Keeps well. Easy to grow, heavy bearing small tree. 300-400 hours. Self-fruitful or pollenized. by Shinseiki, Bartlett, or other.

Shinseiki Asian Pear Juicy, sweet, refreshing, crisp like an apple. Easy to grow. Keeps well. Harvest late July/early August in Central CA. Bright yellow skin. Vigorous, heavy bearing (usually by 2nd year). 250-300 hours. Self-fruitful.

Bing Cherry Large, firm, juicy, sweet, nearly black when ripe. Superb flavor, the No. 1 cherry. Midseason. Large vigorous tree. Pollenized by Black Tart, Van, Rainier and Lapins. Also Stella in colder climates. 700 hours. USDA Zones 5-9.

Black Tartarian Cherry Medium-sized, nearly black, sprightly flavor, early season. Vigorous, productive tree. 700 hours. Pollenizer required - interfruitful with all popular sweet cherries. USDA Zones 5-7.

Craig's Crimson Cherry Taste test winner. Self-fruitful, natural semi-dwarf sweet cherry. Dark red to nearly black, medium to large size, wonderful spicy flavor, very firm texture. Mature tree size about 2/3 of standard (smaller when budded onto Colt or Mahaleb rootstock). Harvest begins early. 500-600 hrs. Zones 5-9. (Zaiger)

Lapins Cherry Self-fruitful, dark red sweet cherry from Canada. Large, firm, good flavor. Similar to Van in color, Bing in shape. Sometimes sold as 'Self-fertile Bing.' Ripens 4 days after Bing. 400 hours or less. USDA Zones 5-9.

Rainier Cherry Large, yellow with red blush. Sweet and flavorful. Very cold hardy. Midseason harvest. 700 hours. Pollenized by Van, Lambert, Lapins, Black Tartarian & Bing. USDA Zones 5-9.

Stella Cherry Self-fruitful - no pollenizer needed. Large, nearly black, richly flavored sweet cherry similar to its parent, Lambert. Late harvest. 400 hours. Pollinates Bing, except in mild winter climates. USDA Zones 5-9.

Van Cherry Very cold hardy, reliable, heavy bearing. Fine fruit similar to Bing, though usually smaller. 700 hours. Pollenizer required - interfruitful with all popular sweet cherries. USDA Zones 4-9.

Green Gage (Bavay's) European Plum Superior selection of gage-type European plum. Small to medium-sized, richly flavored & very sweet. Excellent fresh and for cooking. More productive in moderate winter climates than common Green Gage. Originated in Belgium in 19th century. Estimated winter chilling requirement 700 hours. Self-fruitful.

Black Mission Fig The industry standard. Purplish-black skin, strawberry-colored flesh, rich flavor. Heavy bearing, long-lived, large tree. Coast or inland. Two crops per year. Fresh/dry/can. 100 hours. Self-fruitful. USDA Zones 7-9.

Desert King Fig Light green 'white' skin, strawberry colored pulp. Rich flavor, excellent fresh eating quality. Large breba (spring) crop. Later crop is light in hot climates, heavier in coastal climates. Prune only lightly, occasionally. (Heavy winter pruning removes breba crop.) 100 hours. Self-fruitful. USDA Zones 5-9.

Improved Brown Turkey Fig Large, brown skin, pink flesh. Sweet, rich flavor, used fresh. Widely adapted - coast or inland climate. Small tree, prune to any shape. 100 hours. Self-fruitful. USDA Zones 7-9.

Violette de Bordeaux Fig Small to medium size purple-black fruit with a very deep red strawberry pulp and distinctive, sweet, rich flavor. Brebas are pear-shaped with a thick, tapering neck, main crop figs are variable, often without neck. Medium eye. Excellent fresh or dried. Good for container culture or small spaces. Hardy. Self-fruitful. USDA Zones 5-10.

Multi-Bud Fruit Salad, GDust-Indep-JulElb-LSRosa-Blenheim Gold Dust Peach, Independence Nectarine, July Elberta Peach, Late Santa Rosa Plum and Blenheim Apricot budded onto Lovell rootstock. Finished trees include 5n1's plus assorted 4n1's and 3n1's.

Spice Zee NectaPlum® Interspecific Nectarine The first NectaPlum® from Zaiger Genetics: a white-fleshed, nectarine-peach-plum hybrid. Skin is dark maroon at fruit set, and turns pale pink when ripe. Fully ripe fruit is unparalleled in flavor, and both nectarine and plum traits are easily detectable. Tree is quite ornamental. Tremendous purplish pink bloom in the spring, followed by a flourish of red leaves which mature into lush green in late summer. Self-fruitful. Very productive. 200-300 hours. High chill adaptable. (Pat. No. 13503) (Zaiger)

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Arctic Rose White Nectarine Delicious, super-sweet, white nectarine. Very high scoring in taste tests. Rich flavor and nice crunchy texture when firm ripe, extremely sweet when fully ripe. Harvest mid to late July in Central CA. Highly recommended for home orchards. 600-700 hours. Self-fruitful. (Zaiger)

Double Delight Nectarine Sensational fruit: consistently the best flavored yellow nectarine plus magnificent, double pink flowers. Dark red-skinned, freestone fruit is sweet, with unusually rich flavor. Very high scoring in taste tests. Heavy bearing tree. Harvest early to mid-July in Central CA. 300 hours. Self-fruitful. (Zaiger)

Heavenly White - White Nectarine One of the highest-scoring fruits in Dave Wilson Nursery taste tests. Very large, firm, white-fleshed freestone. Superb acid/sugar balance and rich, complex flavor, a connoisseur's delight. Dull red and cream colored skin. Mid-July in Central CA. 650 hours. Self-fruitful. (Zaiger)

Independence Nectarine Bright red skin, firm yellow freestone. Rich flavor, tangy and sweet, one of the best. Consistently very high-scoring in taste tests. Winter and frost hardy, very reliable producer. Early July in Central CA. 700 hours. Self-fruitful.

Juneglo Nectarine Delicious, full flavored early season fruit ripens late June in Central CA, 7-10 days before Independence, two weeks before Double Delight. Semi-freestone when soft-ripe. Winter and frost hardy. 700 hours. Self-fruitful. (Zaiger)

Necta Zee Miniature Nectarine Sweet, very flavorful yellow freestone, beautiful red skin. Mid-June to early July in central CA. Strong, vigorous tree to 6 ft. Best self-fruitful miniature nectarine. 400 hours or less. Self-fruitful. (Zaiger)

Snow Queen White Nectarine Taste test winner. Sweet, juicy, early season white freestone. Late June harvest in Central CA, 2-3 weeks ahead of Babcock peach. Long-time favorite in So. Calif. Low chilling requirement, 250-300 hours. Self-fruitful.

Arbequina AS1® Olive Arbequina has become California's top variety for oil production. Mild and fruit flavor with low bitterness, the fruit is very high in oil content. It has a compact growing habit and is moderately frost hardy. Self-fruitful, but produces higher yields when planted with a pollinizer such as Arbosana.

Arbosana L43® Olive Mainly grown as a complement to Arbequina, this variety has a more robust flavor than Arbequina. A compact grower that is moderately frost hardy. Fruit matures about 3 weeks later than Arbequina. Self-fruitful but produces higher yields with a pollinizer such as Arbequina.

Koroneiki I-38 Olive Greek variety, originally cultivated on the plains, lower hillsides and coastal areas of Crete where the climate is relatively warm. Adapts well in high density orchards, early producer. Very small fruit size. Excellent oil quality with very high polyphenols. Fruit yield is high with a slight tendency for alternate bearing. Blooms with Arbequina.

Manzanillo Olive Manzanillo is the classic table olive. It's a large variety that can be eaten both green and ripe black. This variety becomes fruitier and less bitter as it ripens. Moderately cold hardy. Self-fruitful but produces higher yields with a pollinizer.

Mission Olive The classic California olive, this variety is the most versatile for the home garden. Whether for curing or oil production, Mission is considered a true edible ornamental. Colder hardier than most olive varieties. Self-fruitful but produces higher yields with a pollinizer.

Elberta Peach Famous yellow freestone. Classic, rich peach flavor: high scoring in taste tests. Use fresh, canned or cooked. Ripe late July/early August in Central CA, up to 3-4 weeks later in colder climates. 600 hours. Self-fruitful.

Frost Peach Resistant to peach leaf curl (10-year trials at Washington State Univ.). Delicious yellow freestone. Slight red blush over greenish-yellow to yellow skin. Heavy bearing, excellent for canning or eating fresh. July ripening. Showy pink bloom in spring. 700 hours. Self-fruitful.

Harken Peach From Canada, a sibling of Canadian Harmony peach. Red-skinned medium size yellow freestone is sweet and flavorful, with non-browning flesh. One of highest rated peaches for Western Washington. Dessert/cooking/freezing. 800 hours. Self-fruitful.

Honey Babe Miniature Peach Sweet, yellow freestone, rich peach flavor. Heavy bearing 5 ft. tree. Early to mid-July in Central California. Excellent choice for home orchard. 400 hours or less. Partly self-fruitful, sometimes shy-bearing without a pollinizer. (Zaiger)

Indian Blood Cling Peach Large, late season canning peach. Red skin, red flesh, rich flavor. Blooms late, sets heavy crops. 800 hours. Self-fruitful.

Indian Free White Peach The all-time highest rated peach at Dave Wilson Nursery fruit tastings. Large freestone, firm crimson and cream colored flesh. Tart until fully ripe, then highly aromatic with a rich, distinctive flavor. Highly resistant to peach leaf curl. Late season. 700 hours. Another nectarine or peach needed to pollinize.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Kaweah Peach A favored late summer peach at Dave Wilson Nursery for providing consistent high yields and large size fruit. Kaweah has a delicious true peach flavor with a good balance of sugar to acid and is an all-purpose fruit good for fresh eating, baking, canning, jams and jellies. Recent low-chill trials have shown Kaweah to be productive with less than 500 chill hours. (Pat. No. 10177) (Zaiger)

O'Henry Peach Popular fresh market yellow freestone and an excellent choice for home planting. Large, firm, full red skin, superb flavor. Ripens early to mid-August in Central CA. Good for freezing. Strong, vigorous, heavy bearing tree. 750 hours. Self-fruitful.

Q-1-8 White Peach Peach leaf curl resistant variety, tested at the WSU research station at Mt. Vernon, Washington. In the Dave Wilson Nursery orchards the white-fleshed, semi-freestone fruit is sweet and juicy like Babcock, with a more sprightly flavor. Harvest mid to late July in Central CA. Showy blossoms. 700-800 hours. Self-fruitful.

Rio Oso Gem Peach Favorite late yellow freestone. Large, sweet, rich flavor, like J.H. Hale. Fresh/freeze. Small tree. Showy bloom. Mid-August in Central CA. 800 hours. Self-fruitful.

Snow King White Peach Large, red-skinned, very firm, subacid, white-fleshed freestone. Farmer's market favorite for its appearance, sweetness and flavor. Harvest late August in Central CA, 3-4 weeks after Elberta. Showy blossoms. 800 hours. Self-fruitful. (Zaiger)

Strawberry Free White Peach Long-time favorite white freestone peach for CA. Very sweet, aromatic, juicy, with superb, delicate flavor. Early to mid-July in Central CA. Highly recommended for home orchards. 400-500 hours. Self-fruitful

Bartlett Pear World's most popular pear. Early midseason, high quality, tolerates hot summers. 500-600 hours. Self-fruitful in most climates of Western U.S. Elsewhere, pollenized by Bosc, D'Anjou, Winter Nelis.

Seckel Pear Connoisseurs' favorite. Sweet, flavorful, aromatic, spicy, perhaps the best dessert pear. Russeted brown skin. Resists fire blight. Does not cross-pollinate with Bartlett. 500 hours. Self-fruitful.

Southern Bartlett Pear Chance Sport of Bartlett found on an old Louisiana homestead. Moderate fire blight resistance. Spreading growth habit. Less than 400 hours chill requirement. Self-fertile.

Warren Pear Excellent quality dessert pear, tree is highly resistant to fire blight. Medium to large, long-necked fruit with pale green skin, sometimes blushed red. Smooth flesh (no grit cells) is juicy and buttery with superb flavor. Good keeper. Cold hardy to -20 deg F. From Mississippi. 600 hours. Self-fruitful

Fuyu (Jiro) Persimmon Medium size, flat shape, still crunchy when ripe, non-astringent. Cool or hot climate. Hardy, attractive tree, practically pest free. Fall harvest. 200 hours. Self-fruitful.

Giant Fuyu Persimmon Larger, not as flat as Fuyu. Crunchy when ripe like Fuyu. Sweet, flavorful, non astringent. Easy to grow, cool or hot climates. Fall harvest. 200 hours. Self-fruitful.

Hachiya Persimmon Large, deep orange-red, acorn-shaped. Hot summer required to mature the fruit. Sweet, flavorful, astringent until soft ripe. Mature fruit can be frozen and thawed to ripen. Productive, ornamental tree. 200 hours. Self-fruitful.

Friar Plum Large, round, black skin, freestone amber flesh. Harvest is prolonged: fruit is hard ripe 4-5 weeks after Santa Rosa, but sweetest and most delicious several weeks later (mid to late August in Central CA). 400 hours. Self-fruitful or plant with Santa Rosa.

Methley Plum Earliest plum: June in Central CA. Juicy, sweet, red flesh, mild flavor. Reddish purple skin. Attractive tree is heavy bearing and vigorous. Extremely cold hardy. 250 hours or less. Self-fruitful.

Santa Rosa Plum Most popular plum in California & Arizona. Juicy, tangy and flavorful. Reddish purple skin, amber flesh tinged red. Late June in Central CA. 300 hours. Self-fruitful.

Dapple Dandy Pluot® Interspecific Plum Taste test winner. Ranks with Flavor King Pluot® among the all-time top five best flavored fruits at Dave Wilson Nursery tastings. Creamy white and red fleshed freestone with wonderful plum-apricot flavor. Skin greenish-yellow with red spots, turning to a maroon and yellow dapple. August harvest in Central CA. 400-500 hours. Pollenized by Flavor Supreme Pluot®, Flavor King Pluot®, Santa Rosa, Catalina or Burgundy Plum. (Pat. No. 9254) (Zaiger)

Flavor Grenade Pluot® Interspecific Plum Elongated green fruit with red blush. Crisp texture, explosive flavor. Taste test winner. Hangs on the tree for 4-6 weeks. Pollenized by Flavor King Pluot®, Dapple Dandy Pluot®, Emerald Drop Pluot® or Santa Rosa plum. 300-400 hours. (Pat. No. 12097) (Zaiger)

Flavor King Pluot® Interspecific Plum Taste test winner. Unique plum-apricot hybrid with sensational bouquet and sweet, spicy flavor. Reddish-purple skin, crimson flesh. Harvest mid-August in Central CA. Naturally small tree. 400 hours or less. Pollenized by Flavor Supreme Pluot® or Dapple Dandy Pluot® and Santa Rosa or Late Santa Rosa plum. (Zaiger)

Grenada Pomegranate A darker, less tart bud sport of Wonderful. Can be grown as a bush or in tree form. Harvest 30 days before Wonderful. Long-lived, any soil. 150 hours. Self-fruitful. (Pat. No. 2618)

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Sharp Velvet Pomegranate Large sized pomegranate with a very appealing, unique, mildly acid, refreshing flavor. Fruit has a dark red exterior and dark seeds the color of crushed red velvet. Upright growing plant sets huge crops of highly ornamental fruit and can be kept any height with summer pruning. Eat fresh or use in cooking. An excellent source of antioxidants. Requires 150-200 chill hours. Self-fruitful.

Wonderful Pomegranate Large, purple-red fruit with delicious, tangy flavor. Best quality in hot inland climate. Gaudy red orange bloom, ornamental foliage. Long-lived, any soil. 150 hours. Self-fruitful.

French Improved Prune California's commercial prune. Reddish purple skin, dark amber flesh. Very sweet, high quality fruit dessert/can/dry. 800 hours. Self-fruitful.

Italian Prune Large, purple skin, freestone. Rich flavor, very sweet when fully ripe. Fresh/dried/canned. Vigorous, cold hardy tree. Late bloom. Late summer harvest. 800 hours. Self-fruitful.

Bluecrop Northern Highbush Blueberry No. 1 variety, the standard of excellence. Upright, vigorous bush. Very productive. Large, firm, great flavor. Fruit does not drop or crack. 800 hours. Self-fruitful.

Blueray Northern Highbush Blueberry Best variety for hot climates. Large, firm fruit, excellent flavor. Upright, vigorous bush, very productive. 800 hours. Self-fruitful

Emerald Southern Highbush Blueberry Produces abundant clusters of large to very large berries with tasty, balanced sweet flavor. Very productive and highly rated. Zones 7-10. Self-fruitful. Estimated at 250 hours chill or less. (U.S. Plant Patent #12165)

Jewel Southern Highbush Blueberry One of California's leading commercial varieties due to its high adaptability. Exceptional growth and high yields. Midseason harvest of large to very large berries with tangy sweet flavor. Chill requirement estimated at 200 hours. Self-fruitful, zones 7-10. (U.S. Plant Patent #11807)

Misty Southern Highbush Blueberry Southern Highbush. Early season. In the West Misty is quite vigorous, growing very well on the coast and in the inland heat. This especially flavorful fruit does well in areas with chilling as low as 150 hours and all areas with mild winters and hot summers.

O'Neal Southern Highbush Blueberry Southern Highbush. Large fruit is especially sweet and flavorful. Early season. 5-6 ft. bush. 200 hours. Self-fruitful, but plant two varieties for largest crops.

Goji Berry Bright red fruit used either fresh or dried. Contains the highest antioxidant level of any fruit type. Drought tolerant once established and very cold hardy. Self-fertile. USDA zone 5-9.

Cabernet Sauvignon Grape Late season red wine grape with small, black, strongly flavored berry. Vigorous, upright vine. 100 hours. Self-fruitful. Cane prune.

Cascade Hops Cascade and Centennial are the basic hops varieties grown for home brewing.

Centennial Hops Cascade and Centennial are the basic hops varieties grown for home brewing.

Dwarf Everbearing Mulberry *Morus sp. 'Dwarf Everbearing'* This bush form of mulberry continuously produces sweet blackberry-like fruit throughout the season. A great choice for container gardening, minor pruning will keep the plant compact. Mature height 6'-8' if grown in the ground. Widely adapted, self-fruitful. USDA zones 5-11.

All-in-One Genetic Semi-Dwarf Almond No. 1 almond for home orchards. Heavy crops of soft shell nuts with sweet, flavorful kernels. Hot summer required to ripen. 15 ft. tree, very winter and frost hardy. 300-400 hrs. Self-fruitful. (Zaiger)

Kerman Female Pistachio Long hot summers required to ripen. Plant from containers only, do not disturb root ball when handling. Very slow-growing to 20-30 ft. Drought-resistant. 800 hours. Pollenized by Peters.

Peters Male Pistachio Pollenizer for Kerman. Does not bear fruit. One Peters pollinizes up to eleven females. Plant from containers only. Drought-resistant once established. 800 hours.

Franquette Walnut Last English walnut to leaf out, less susceptible to spring frost damage. Very large tree, excellent shade. Fair production of well sealed, thin-shelled, high quality nuts. Pollenizer for Hartley. 700 hours. Self-fruitful. (Rootstock: NCB walnut.)

Bradford Flowering Pear *Pyrus calleryana 'Bradford'* One of the most popular ornamental deciduous trees. Snow-white bloom in spring. Attractive glossy foliage turns red in fall. Moderately upright growth to 40 ft. or more.

Krauter Vesuvius Flowering Plum *Prunus cerasifera 'Krauter Vesuvius'* Dark purple leaves, light pink blossoms, little or no fruit. Relatively small tree, 18 ft. high by 12 ft. wide. Favorite purple leaf plum for California. Foliage of newly planted trees sometimes greenish until vigorous growth begins. Traditional K.V. form: 30" trunk.

Contorted Filbert (*Corylus avellana 'Contorta'*, Henry Lauder's Walking Stick) Very unusual and distinctive small tree to 8-10 ft. Picturesquely twisted and gnarled branches, small leaves. Interesting container plant. Sunset Zones 1-9, 14-20.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.

Raywood Ash *Fraxinus oxycarpa* 'Raywoodi' Fast growing, tolerates heat, cold, alkaline soil. Compact, round-headed. Small, delicate leaves, lacy appearance. Purplish-red fall color. No seeds. 25-35 ft.

Western Catalpa *Catalpa speciosa* Widely adapted - cold or hot climates. All soils. Large, heart-shaped leaves, long seed capsules shaped like beans. White flowers in late spring and summer. Flowers & pods litter beneath tree. 40-60 ft. high.

Pink Dawn Chitalpa *Chitalpa tashkentensis* 'Pink Dawn' *Chilopsis linearis* x *Catalpa bignonioides*. Very fast-growing, relatively small single or multi-trunked tree, reaches approximately 20 by 20 ft. Very drought tolerant. Large clusters of trumpet-shaped flowers in summer are pale purplish-pink with pale yellow throat. Long, narrow, attractive, glossy green leaves. Hybridized in Russia. Adapted to Southern California and low desert climates of the Southwestern U.S.

Paul's Scarlet Hawthorn *Crataegus laevigata* 'Paul's Scarlet' The showiest hawthorn. Profuse, double, scarlet flowers. Toothed, lobed leaves. Thorny branches. Grows to 20-25 by 15-20 ft. Tends toward rank growth if given too much water. Sunset Zones 1-11, 14-17.

Autumn Fantasy® Maple *Acer x freemanii* 'Autumn Fantasy' Hybrid of red maple and silver maple. Bright red fall color, even in warm climates. Fast-growing, strong-limbed, tolerates alkaline soil, drought. Sunset Zones 1-9, 14-24.

European Mountain Ash *Sorbus aucuparia* Showy bright orange-red fruit in fall. Upright growth, oval to rounded, reaching 35 by 25 ft. White flower clusters, dark green fernlike leaflets. Tolerates heat, cold, wind. Fall colors vary. Sunset Zones 1-10, 14-17.

Fruitless Mulberry *Morus alba* 'Fruitless' Fast-growing, to 40 by 50 ft., dense shade. Tolerates summer heat, alkaline soil. Drought tolerant, but best with ample water and feeding. Not necessary to prune back to trunk each winter. All zones.

Western Redbud *Cercis occidentalis* Single or multi-trunked tree to 15 by 15 ft. Spectacular, bright purplish-pink sweet-pea-shaped flowers. Yellow to red fall color. Drought tolerant, resistant to oak root fungus. Sunset Zones 2-24.

Corkscrew Willow *Salix matsudana* 'Tortuosa' Remarkable growth pattern of twisted, spiraling branches. Less dependent on high soil moisture than other willows - good choice for high desert. Grows to 30 by 20 ft. All zones.

“(Zaiger)” at the end of a description indicates a variety developed by Zaiger Genetics of Modesto, CA. Patented and patent pending Zaiger varieties are available exclusively from Dave Wilson Nursery.
